

Enhancing Diversity in Graduate Education

2023 EDGE Summer Program

June 4 - July 1, 2023

Brown University, Providence, RI

Corporate Sponsorship Opportunities

The EDGE Foundation seeks sponsors to support the 2023 EDGE Summer Program, a transformative program designed to diversify and strengthen the STEM workforce. Your company would have prominent visibility among 300+ rising leaders in the mathematics community. Your sponsorship supports our mission to inspire and empower the next generation of women leaders in STEM.

Sponsorship Benefits & Recognition

Visionary Sponsor (\$30,000)

Empower a new generation of leaders in STEM.

To become a Summer Program sponsor today, contact Amy Oden at amy.oden@pomona.edu

THE SYLVIA BOZEMAN AND RHONDA HUGHES
EDGE FOUNDATION

The EDGE Summer Program

The Enhancing Diversity in Graduate Education (EDGE) Foundation is a non-profit organization that increases gender and racial equity at the highest levels of mathematics through a number of programs. The annual Summer Program puts EDGE's mission into action by empowering a cohort of women mathematicians to succeed in their math PhD programs. For 25 years, the EDGE Summer Program has successfully increased diversity in mathematics in order to uplift future STEM leaders, enrich the US workforce, transform STEM education, and propel innovative research.

A Program That Works

The four week program uses strategies proven to increase retention in graduate school, and its alumni are in visible leadership positions in all mathematical sectors: as of Fall 2022, over 129 EDGE participants work in academia or education, 16 work in government (such as the CDC and the Census Bureau), and 62 work in industry. The EDGE Program has received numerous awards, including the Presidential Award for Excellence in Science, Mathematics and Engineering Mentoring.

Our Unwavering Commitment to Diversity

U.S. women earn only 30% of math PhDs in the US, and Black, Latinx, and/or Native women earn less than 1%. EDGE empowers the best and brightest minds to succeed in STEM innovation and education through an intersectional approach. EDGE supports young women - many of whom are underrepresented minorities in STEM (Black, Latine, Native American) - to persist and thrive in their careers. The EDGE alumni community, 25 years strong, is uniquely robust, lively, and widespread.

Join In Our Vision

EDGE seeks like-minded partners who can support the EDGE Summer Program, help us expand our reach to support more women and to join us in breaking down barriers to inclusivity within mathematics.

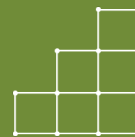

EDGE Summer Program by the Numbers

- **17** women in each cohort: 14 new PhD students and 3 advanced PhD students.
- **50%+** of all students, peer mentors, and facilitators are Black or Brown.
- **311** Summer Program alumni since 1998.
- **222** alumni have earned advanced degrees; **126** have earned PhDs.
- **23%** of all Black women who earned math PhDs in the US 2003-2018 are EDGE Summer Program alumni.
- **300+** educational institutions, corporations, government agencies employ EDGE alumni.

Our Method

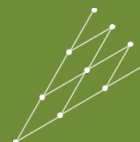

We equip our rising leaders with a foundation, mentorship, and a lasting network.

The EDGE Summer Program provides a **foundation** for success through rigorous workshops in key subjects, collaborative problem sessions, research presentations, and community-building events.

Tiered **mentorship** is our secret to success. The EDGE Summer Program promotes connections between new graduate students, advanced graduate students, and faculty from all levels.

Role models, mentors, and peers are crucial for women's persistence in STEM, especially for women of color. EDGE provides a robust **professional network**, organizing multiple cohort reunions each year.
